

IATA Cargo-XML & ASYCUDA

Boosting Global Adoption of Cargo Messaging Standards

IATA Cargo-XML integrated into ASYCUDA World is enhancing efficiency, driving trade growth and maximizing safety and security in over 90 countries

What is IATA Cargo-XML in ASYCUDA?

Ongoing cooperation between the International Air Transport Association (IATA) and the Automated System for Customs Data (ASYCUDA) Programme of the United Nations Conference on Trade and Development (UNCTAD), ASYCUDAWorld (AW) resulted in the incorporation of IATA Cargo XML standards into the AW cargo manifest processing module through a dynamic mechanism. Airlines, freight forwarders and shippers can now use this global standard to exchange air cargo electronic information with customs authorities with AW.

Handling Information

No. of Pieces RCP	Gross Weight	Rate Class	Chargeable Weight	Rate/Charge	Total
2	14.000		14.000	0.00000	0.00

Benefits

For Customs:

- Customs operations are modernized through the removal of a paper environment
- Security is enhanced through improved risk assessment
- Full compliance with customs regulations is facilitated

For Trade:

- Airlines, freight forwarders, shippers and border agencies in over 90 countries can now talk the same digital language
- Message duplication is reduced
- Data integrity is maintained
- Communication across the supply chain is simplified
- Error and Acknowledgement handling is improved

Why IATA Cargo-XML in ASYCUDA?

Cargo-XML makes it easier for airlines, freight forwarders and shippers to ensure that the information being provided to the customs authorities is technically correct and in line with the standards of international bodies such as the World Customs Organization (WCO) and United Nations. It also facilitates customs risk assessments for air cargo shipments and improves compliance with security regulations.
